

# NeoSEALER® EZFlo

DESIGNED FOR MINIMALLY INVASIVE ENDODONTICS (MIE)

## FORMULATED WITH MORE BIOACTIVE CEMENT THAN OTHER BIOCERAMIC SEALERS<sup>1</sup>

Formulated with MORE bioactive cement than competitors for improved setting and solubility.

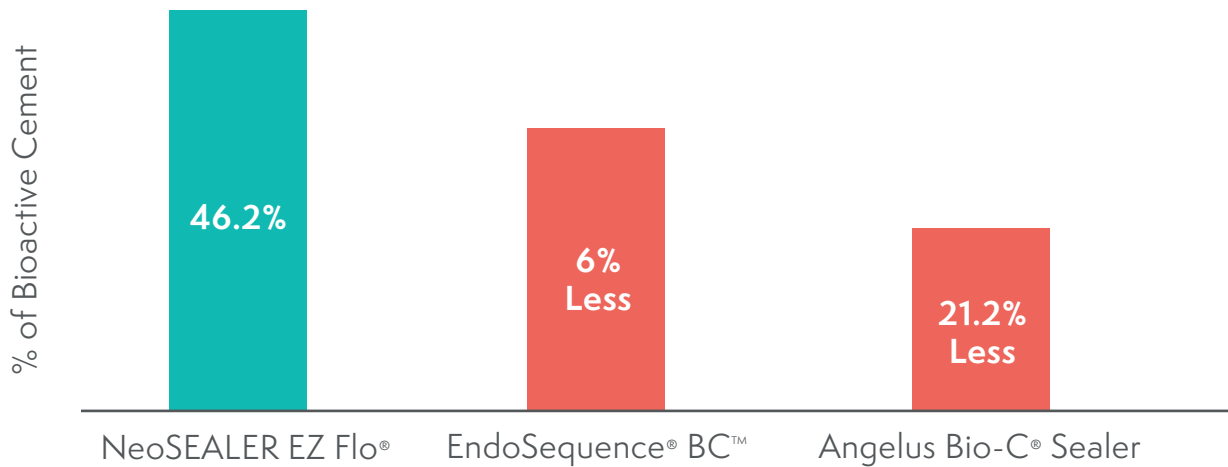

## VERSATILE

One sealer to streamline your practice. Suitable for both warm and cold obturation techniques. NeoSEALER EZFlo will NOT change consistency with warm obturation techniques.

## HIGHER CEMENT CONTENT

### Competitor Analysis of Cement Content\*

\*Bio-C® Sealer and EndoSequence® BC™ are not registered trademarks of Avalon Biomed.

## ONE PRODUCT FOR ALL OBTURATION TECHNIQUES

**NeoSEALER EZFlo will NOT change consistency**  
with warm obturation techniques<sup>2\*</sup>

**NeoSEALER® EZFlo**

Endodontic plugger with **NeoSEALER EZFlo** after warm vertical condensation. Note the sealer **remains paste-like without desiccation**.

**EndoSequence® BC Sealer™\***

Endodontic plugger with **EndoSequence BC Sealer** after warm obturation. Note the **desiccated and chunky appearance**.

VS

“NeoSEALER EZFlo’s flowability marries perfectly with the minimal shapes created by SlimShapers. It’s easily extruded and provides an excellent 3D seal.”
